CASE STUDY:

RE-ENGINEERING THE DOCUMENT PRODUCTION PROCESS AT
CITIZENS BANK TO CUT COSTS, IMPROVE PERFORMANCE AND
ENABLE BETTER CUSTOMER COMMUNICATIONS

CITIZENS BANK

"SEFAS HAS BEEN A GREAT PARTNER.
WHEN YOU ARE RE-ENGINEERING
MAJOR BUSINESS APPLICATIONS, IT
TAKES A PROVIDER THAT IS FLEXIBLE,
BRINGS EXPERTISE AND IS REACTIVE.
SEFAS CLEARLY MET OUR
EXPECTATIONS."

" WE WERE SEEKING
A SOLUTION THAT
FITTED OUR LONG
TERM STRATEGIC
VISION WHILE
DELIVERING
TACTICAL RESULTS "

OVERVIEW

In an increasingly competitive banking industry, Citizens Bank realised that there was a lot to gain by redesigning its entire document production process. In addition to significantly reducing operational costs, it was possible to increase revenue streams by using transactional documents as a marketing tool to cross-sell its products and services.

As part of this strategy, Citizens Bank chose Sefas to redesign its transactional documents and better communicate with customers.

According to Philip Cusick, Manager of the Enterprise Payment Print Center, *"We realised that, as part of our efforts to improve the business, we needed to improve our print and mail process to move into the new age of customer communications."*

Citizens Bank realised that it needed to address the following problems:

- The legacy document composition tool and cheque imaging tool did not enable the bank to easily convert the statements from simplex to duplex, which prevented Citizens Bank from achieving significant postage savings.
- The existing statements were still using OMR marks for insertion control, a method that does not provide document integrity.
- The company was facing address quality issues that resulted in a high numbers of returned mail pieces that needed to be manually reprocessed.
- A number of departments were outsourcing print and mail when they could have been producing these applications in-house at a lower cost.
- The existing composition tool could not perform functions that were critical to marketing effectiveness, such as white space management or easily adding promotional messaging and colour.
- The document production suite needed to support all distribution channels.

CITIZENS FINANCIAL GROUP IS ONE OF THE LARGEST AND OLDEST FINANCIAL INSTITUTIONS IN THE UNITED STATES, OFFERING A BROAD RANGE OF RETAIL AND COMMERCIAL BANKING PRODUCTS TO INDIVIDUALS, SMALL BUSINESSES, AND LARGE CORPORATIONS. IT OFFERS AN INTEGRATED CUSTOMER EXPERIENCE THAT INCLUDES MOBILE AND ONLINE BANKING, CONTACT CENTER AND THOUSANDS OF BRANCHES AND ATMS ACROSS THE US.

CUSTOMER BACKGROUND

THE APPROACH

Citizens Bank issued an RFP and evaluated different software vendors to support its efforts to streamline operations. Cusick stated, *“One of our biggest challenges was the conversion of legacy simplex documents into duplex documents. We gave competing vendors test files. Sefas turned the files around in a matter of a couple of days, while other vendors took weeks.”*

It was also important to work with a company that was capable of offering an end-to-end solution from composition to production management because all the modules were already integrated and designed to work together.

THE SOLUTION

To address duplex conversion and statement integrity, Citizens Bank used Sefas’s Transform module in HC Designer. Post-composition enhances and transforms print streams without changing the original application.

The core of the client’s requirement was the integration with the Kern Mail Factory software, which enabled HC Producer to learn the status of the inserters and keep track of jobs and mail pieces.

For its address quality project, the client used HC Producer’s merging and processing function to get optimum results.

SEFAS

THE RESULTS

By implementing Sefas's Harmonie Communication Suite (HCS) solution, Citizens Bank demonstrated the ability to plan strategically and implement tactically. It identified and deployed "quick win" projects that provide maximum benefits with minimum investments. Since implementation, Citizens Bank has seen over \$3 million in readily identifiable savings.

Additional benefits that accrued cut across the enterprise, such as duplex conversion, improvement of address quality, bringing back work inhouse that was previously outsourced and automating the process for all types of business communications.

DISCOVER MORE WITH SEFAS

Sefas, a Messagepoint company, helps organisations produce personalised, omni-channel customer communications that enhance customer experiences. From document composition to production management and digital delivery, SEFAS solutions enable organisations manage customer communications across print and digital channels. Visit us at www.sefas.com to learn more.

Messagepoint is a leading provider of customer communications management software. Only Messagepoint harnesses AI-powered Content Intelligence to automate and simplify the process of migrating, optimizing, authoring and managing complex customer communications for non-technical (business) users. Customers rely on its award-winning platform to consistently deliver exceptional, highly personalized customer communications across all platforms and channels.
